Operator Manual Copy Reference

Read this manual carefully before you use this product and keep it handy for future reference.
For safety, please follow the instructions in this manual.

## Introduction

This manual contains detailed instructions on the operation and maintenance of this machine. To get maximum versatility from this machine all operators should carefully read and follow the instructions in this manual. Please keep this manual in a handy place near the machine.
Please read the Safety Information before using this machine. It contains important information related to USER SAFETY and PREVENTING EQUIPMENT PROBLEMS.

## Notes

Some illustrations may be slightly different from your machine.
Certain options may not be available in some countries. For details, please contact your local dealer.

## Operator Safety

This machine is considered a class 1 laser device, safe for office/EDP use. The machine contains two GaAIAs laser diodes, 5 -milliwatt, 760-800 nanometer wavelength for each emitter. Direct (or indirect reflected) eye contact with the laser beam might cause serious eye damage. Safety precautions and interlock mechanisms have been designed to prevent any possible laser beam exposure to the operator.

## Laser Safety:

The Center for Devices and Radiological Health (CDRH) prohibits the repair of laser-based optical unit in the field. The optical housing unit can only be repaired in a factory or at a location with the requisite equipment. The laser subsystem is replaceable in the field by a qualified Customer Engineer. The laser chassis is not repairable in the field. Customer engineers are therefore directed to return all chassis and laser subsystems to the factory or service depot when replacement or the optical subsystem is required.

## Warning:

Use of controls or adjustment or performance of procedures other than those specified in this manual might result in hazardous radiation exposure.

## Notes:

The model names of the machines do not appear in the following pages. Check the type of your machine before reading this manual. (For details, $\Rightarrow$ P. 1 "Machine Types".)

- Type1: 2235, 2535/2535p, 3502/3502p
- Type2: 2245, 2545/2545p, 4502/4502p

Certain types might not be available in some countries. For details, please contact your local dealer.
Two kinds of size notation are employed in this manual. With this machine refer to the inch version.
For good copy quality, Savin recommends that you use genuine toner.
Savin shall not be responsible for any damage or expense that might result from the use of parts other than genuine parts in your office product.

## Power Source

$120 \mathrm{~V}, 60 \mathrm{~Hz}, 12 \mathrm{~A}$ or more
Please be sure to connect the power cord to a power source as above. For details about power source, $\Rightarrow$ P. 237 "Power Connection".

## USA (This information is for facsimile option users only.)

## * FCC Requirements

1. This equipment complies with Part 68 of the FCC rules. On the cover of this equipment is a label that contains, among other information, the FCC registration number and ringer equivalence number (REN) for this equipment. If requested, this information must be provided to the telephone company.
2. This equipment uses the following USOC jack: RJ11C
3. The REN is used to determine the quantity of devices which may be connected to the telephone line. Excessive REN's on the telephone line may result in the devices not ringing in response to an incoming call. In most, but not all areas, the sum of the REN's should not exceed five (5.0). Contact the telephone company to determine the maximum REN for the calling area.
4. If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. If advance notice is not practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.
5. The telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the operation of the equipment. If this happens, the telephone company will provide advance notice in order for you to make necessary modifications in order to maintain uninterrupted service.
6. In the event of operation problems (document jam, copy jam, communication error indication), refer to the solving problems section in this manual.
7. If you cannot correct the problem, please contact the SAVIN CORPORATION at 1-203-9675000 for repair and warranty information. If it is causing harm to the telephone network, the telephone company may request you to disconnect the equipment from the network until the problem is resolved.
8. This equipment cannot be used on telephone company-provided coin service. Connection to Party Line Service is subject to state tariffs.

## WHEN PROGRAMMING EMERGENCY NUMBERS AND/OR MAKING TEST CALLS TO

 EMERGENCY NUMBERS:1. Remain on the line and briefly explain to the dispatcher the reason for the call before hanging up.
2. Perform such activities in the off-peak hours, such as early morning hours or late evenings.

## CANADA (This information is for facsimile option users only.)

The Industry Canada label identifies certified equipment. This certification means that the equipment meets telecommunications network protective, operational, and safety requirements as prescribed in the appropriate Terminal Equipment Technical Requirements document(s). The department does not guarantee the equipment will operate to the user's satisfaction.
Before installing this equipment, users should ensure that it is permissible to be connected to the facilities of the local telecommunications company. The equipment must also be installed using an acceptable method of connection. The customer should be aware that compliance with the above conditions may not prevent degradation of service in some situations.
Repairs to certified equipment should be coordinated by a representative designated by the supplier. Any repairs or alterations made by the user to this equipment, or equipment malfunctions, may give the telecommunications company cause to request the user disconnect the equipment.
Users should ensure for their own protection that the electrical ground connections of the power utility, telephone lines, and internal metallic water pipe system, if present, are connected together. This precaution may be particularly important in rural areas.
Caution: Users should not attempt to make such connections themselves, but should contact the appropriate electric inspection authority, or electrician, as appropriate.
The Ringer Equivalence Number (REN) assigned to each terminal device provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed 5.

In accordance with IEC 60417, this machine uses the following symbols for the main power switch:
I means POWER ON.
(し) means STAND BY.

## Safety Information

When using your equipment, the following safety precautions should always be followed.

## Safety During Operation

In this manual, the following important symbols are used:
. WARNING:
Indicates a potentially hazardous situation which, if instructions are not followed, could result in death or serious injury.
$\triangle$ CAUTION:
Indicates a potentially hazardous situation which, if instructions are not followed, may result in minor or moderate injury or damage to property.

## WARNING:

- Connect the power cord directly into a wall outlet and never use an extension cord.
- Disconnect the power plug (by pulling the plug, not the cable) if the power cable or plug becomes frayed or otherwise damaged.
- To avoid hazardous electric shock or laser radiation exposure, do not remove any covers or screws other than those specified in this manual.
- Turn off the power and disconnect the power plug (by pulling the plug, not the cable) if any of the following conditions exists:
- You spill something into the equipment.
- You suspect that your equipment needs service or repair.
- Your equipment's cover has been damaged.
- Do not incinerate spilled toner or used toner. Toner dust might ignite when exposed to an open flame.
- Disposal can take place at our authorized dealer or at appropriate collection sites.
- Dispose of the used toner bottle in accordance with the local regulation.

## © CAUTION:

- Protect the equipment from dampness or wet weather, such as rain, snow, and so on.
- Unplug the power cord from the wall outlet before you move the equipment. While moving the equipment, you should take care that the power cord will not be damaged under the equipment.
- When you disconnect the power plug from the wall outlet, always pull the plug (not the cable).
- Do not allow paper clips, staples, or other small metallic objects to fall inside the equipment.
- Keep toner (used or unused) and toner bottle out of the reach of children.
- For environmental reasons, do not dispose of the equipment or expended supply waste at household waste collection points. Disposal can take place at an authorized dealer or at appropriate collection sites.
- The inside of the machine could be very hot. Do not touch the parts with a label indicating the "hot surface". Otherwise it could cause a personal burn.
- Our products are engineered to meet high standards of quality and functionality, and we recommend that you only use the expendable supplies available at an authorized dealer.

## How to Read this Manual

## Symbols

In this manual，the following symbols are used：

## WARNING：

This symbol indicates a potentially hazardous situation that might result in death or serious injury when you misuse the machine without following the in－ structions under this symbol．Be sure to read the instructions，all of which are in－ cluded in the Safety Information section．

## $\triangle$ CAUTION：

This symbol indicates a potentially hazardous situation that might result in mi－ nor or moderate injury or property damage that does not involve personal injury when you misuse the machine without following the instructions under this symbol．Be sure to read the instructions，all of which are included in the Safety Information section．
－WARNINGS and CAUTIONS are notes for your safety．

## 觬Important

If this instruction is not followed，paper might be misfeed，originals might be damaged，or data might be lost．Be sure to read this．

## Preparation

This symbol indicates the prior knowledge or preparations required before op－ erating．

## O Note

This symbol indicates precautions for operation or actions to take after misoper－ ation．

## －Limitation

This symbol indicates numerical limits，functions that cannot be used together， or conditions in which a particular function cannot be used．

## $\delta_{\text {Reference }}$

This symbol indicates a reference．

## Guide To Components

## 1. Document Feeder (ADF)

The document feeder automatically feeds a stack of originals one by one.

## 2. Exposure glass

Place originals here face down for copying. $\Rightarrow$ P. 19 "Originals"

## 3. Internal tray

Copied paper is delivered here face down.

## 4. Main power switch

If the machine does not operate after turning on the main power switch, check if the main power switch is turned on. If it is off, turn it on.

## 5. Main power indicator

This indicator light up when the main power switch is turned on, and goes off when the switch is turned off.

## 6. On indicator

This indicator lights up when the operation switch is turned on, and goes off when the switch is turned off.

## 7. Operation switch

Press this switch to turn the power on (the On indicator light up). To turn the power off, press this switch again (the $\mathbf{O n}$ indicator goes off).

## 8. Control panel

$\Rightarrow$ P. 9 "Control Panel"
9. Duplex unit (Unit for two-sided copies)
Makes two-sided copies.

## 10. Front cover

Open to access the inside of the machine.

## 11. Paper tray

Set paper here.
12. Paper tray unit (Option)
13. Holding stand

## 1. Bypass tray

Use when copying onto OHP transparencies, adhesive labels, translucent paper, postcards, and custom size paper.

## 2. Right side cover

Open this when a paper jam occurs.

## 1. Ventilation hole

Prevents overheating. Do not obstruct the ventilation hole by placing an object near it or leaning an object against it. If the machine overheats, a fault might occur.

## Output Tray Guide

When copying onto OHP transparencies and translucent paper, raise the guide.
This prevents copies from being curled when delivered.

* To copy onto normal paper and thick paper

Slide the guide in the direction of the arrow.

* To copy onto OHP transparencies and translucent paper

Insert your forefinger into the indent on the guide and slide the guide to the right.

* To copy onto A3, 11" $\times 17$ " paper

Raise the end fence.

## Options

## 1. 1000-Sheet Finisher

Sorts, stacks, and staples copies.

## 2. External tray

If you selected this as the output tray, copied paper is delivered here face down.

## 3. Platen cover

Lower this cover over originals for copying.
4. Document feeder (ADF) $\Rightarrow P .32$ Insert a stack of originals here. They will be fed automatically.
5. Internal tray 2 ( 1 bin tray)

If you selected this as the output tray, copied paper is delivered here face down.

## 6. Large Capacity Tray (LCT)

 Holds 1,500 sheets of paper.
## 7. Paper tray unit

Consists of two paper trays.

## 8. Bridge unit

Relays copies to the external tray or finisher.

## 9. 2 Tray Finisher

Sorts, stacks, and staples copies. You can also punch copies. (The Punch function is optional.)

- 1: Finisher shift tray 1
- 2: Finisher shift tray 2

## Turning On the Power

To turn the machine on, press the operation switch.

## Note

$\square$ This machine automatically enters Energy Saver mode or turns itself off if you do not use the machine for a while. P. 30 "Auto Off" and "Timer Setting" in the System Settings manual.

## Power switches

This machine has two power switches. $\Rightarrow$ P. 11 "Display Panel"

Operation switch (right side of the control panel)
Press this switch to activate the machine. When the machine has warmed up, you can make copies.

* Main power switch (left side of the machine)
When the machine is not to be used for an extended period of time, turn off the main power switch.

## Turning On the Main Power

1 Make sure that the power cord is firmly plugged into the wall outlet.
2 Open the switch cover and turn on the main power switch (make sure that the Main Power indicator goes on).

## 䈔Important

$\square$ Do not switch off the main power immediately after it has been switched on. Failure to observe this may result in damage to the hard disk or memory, leading to malfunctions.

## Turning On the Power

1 Press the operation switch to make the On indicator goes on.
The display panel will come on.

## Note

$\square$ If the power is not turned on when the operation switch is pressed, check if the main power switch is on. If off, turn it on.
$\square$ During the warm-up period (less than 10 seconds for Type 1, less than 15 seconds for Type 2), you can use the Auto Start function.

## Turning Off the Power

1 Make sure that the platen cover or the document feeder is in the right position.
2 Press the operation switch to make the On indicator goes off.

## Note

$\square$ Even if you press the operation switch, the indicator do not goes off and blink in the following cases:

- When the platen cover or the document feeder is open.
- When communication is in progress with external equipment.
- When the hard disk is operating.

## Turning Off the Main Power

Make sure that the On indicator goes off.
2 Turn off the main power switch to make sure the indicator goes off.

## 蕸Important

$\square$ Do not turn off the main power switch when the indicator goes on or blink Hard Disk or Memory might be broken.
$\square$ Pull out the power plug after you turn off the main power switch. Hard Disk or Memory might be broken.
$\square$ If the main power switch is turned off, or the power plug is disconnected, any documents stored in fax memory will be lost after approximately one hour elapses.

## Changing Modes

You can use this machine not only as a copier，but also as a fax，printer，docu－ ment server and scanner as well．Press the 【Copy】，［Facsimile】，［Printer】，［Scan－ ner】 or 【Document Server】 key to use that function．

## ：Limitation

$\square$ You cannot switch modes in the following cases：
－During interrupt copying
－When scanning in a fax message for transmission
－During immediate transmission
－During on hook dialing for fax transmission
－While scanning an original
－When accessing the user tools

## Originals

## Sizes and Weights of Recommended Originals

## Note

I The number of originals that can be set in the document feeder is about 80 .
$\square$ Original weight in Mixed Size mode is $52-81 \mathrm{~g} / \mathrm{m}^{2}, 13.8-21.5 \mathrm{lb}$.

## Non-recommended originals for the document feeder

Setting the following types of originals in the document feeder can cause paper misfeeds or damage to the originals. Set these originals on the exposure glass instead.

- Originals other than those specified in $\Rightarrow$ P. 19 "Sizes and Weights of Recommended Originals"
- Stapled or clipped originals
- Perforated or torn originals
- Curled, folded, or creased originals
- Pasted originals
- Originals with any kind of coating, such as thermal fax paper, art paper, aluminum foil, carbon paper, or conductive paper
- Originals with perforated lines
- Originals with indexes, tags, or other projecting parts
- Sticky originals such as translucent paper
- Thin originals that have low stiffness
- Thick originals such as postcards
- Originals of inappropriate weight
- Bound originals such as books
- Transparent originals such as OHP transparencies or translucent paper
- Originals that have correction fluid or ink on them that has not completely dried

## Sizes difficult to detect

It is difficult for the machine to detect the sizes of the following originals, so select the paper size manually.

- Originals with indexes, tags, or other projecting parts
- Transparent originals such as OHP transparencies or translucent paper
- Dark originals with many letters and drawings
- Originals which partially contain a solid image
- Originals which have solid images at their edges

## Missing Image Area

Exposure glass

## Document feeder

## - Limitation

$\square$ Even if you correctly set originals in the document feeder or on the exposure glass, 3 mm ( $0.1^{\prime \prime}$ ) margins on all four sides of the original might not be copied.
$\square$ There are cases where the paper will be fed diagonally when a paper size of 433 mm or larger is used. Ensure that the paper is set in place it is fed straight.
$\square$ The system length setting is at its maximum value when set at 1260 mm (49").

${ }^{* 5}$ If you wish to copy onto thick（ $128 \mathrm{~g} / \mathrm{m}^{2}, 34 \mathrm{lb}$ or heavier）paper，select Thick Paper mode．$\Rightarrow$＂Special Paper Indication＂in the System Settings manual．

## 旗Important

$\square$ If you use damp or curled paper, a misfeed might occur. In this case, try turning over the paper stack in the paper tray. If there is no improvement, change to paper with less curl.

## (3) Note

$\square$ When you use the bypass tray, it is recommended to set the copy paper direction to $\square$
$\square$ Postcards should be fed from the bypass tray.
$\square$ If you load paper of the same size and in the same direction in two or more trays, the machine automatically shifts to another tray when the tray in use runs out of paper. This function is called Auto Tray Switching. (However, this only true if the Paper Type is recycled or special paper, and the setting for the other trays are the same.) This saves interrupting a copy run to replenish paper when making a large number of copies. $\Rightarrow$ P. 40 "Selecting Copy Paper", $\Rightarrow$ P. 212 "Auto Tray Switching"
$\square$ If you select Thick Paper mode, copying speed might be reduced.

## Direction-fixed paper or 2-sided paper

The direction-fixed (top to bottom) or 2-sided paper (letterhead paper, punched paper, or copied paper, e.g.) might not be printed correctly depending on how the originals and paper are set in place. Set "Letterhead setting" of system settings and then set the original and paper as shown below. $\Rightarrow$ "Letterhead Setting" in $\Rightarrow$ P. 233 "Input/Output"

|  |  | Paper Tray | Large Capacity Tray | Bypass Tray |  |

## Non-recommended Paper

## $\triangle$ CAUTION: <br> - Do not use aluminum foil, carbon paper, or similar conductive paper to avoid a fire or equipment failure.

## 菲important

I Do not use any of the following kinds of paper or a fault might occur.

- Thermal fax paper
- Art paper
- Aluminum foil
- Carbon paper
- Conductive paper
- Colored OHP transparencies
- Paper with perforated lines
- Hemmed paper

## Note

$\square$ Do not use the following kinds of paper or a misfeed might occur.

- Bent, folded, or creased paper
- Torn paper
- Slippery paper
- Perforated paper
- Rough paper
- Thin paper that has low stiffness
- Paper with much paper dust on its surface
$\square$ If you make a copy on rough grain paper, the copy image might be blurred.

## Paper Storage

## Note

$\square$ When storing paper, the following precautions should always be followed:

- Do not store paper where it will be exposed to direct sunlight.
- Avoid storing paper in humid areas (humidity: $70 \%$ or less).
- Store on a flat surface.
- Keep open reams of papers in the package, and store as you would unopened paper.
$\square$ Under high temperature and high humidity, or low temperature and low humidity conditions, store paper in a vinyl bag.

## Toner

## Handling Toner

## ① WARNING:

- Do not incinerate used toner or toner containers. Toner dust might ignite when exposed to an open flame. Dispose of used toner containers in accordance with local regulations for plastics.
$\triangle$ CAUTION:
- Keep toner (used or unused) and toner containers out of reach of children.

## $\triangle$ CAUTION:

- Our products are engineered to meet high standards of quality and functionality, and we recommend that you only use the expendable supplies available at an authorized dealer.

## 濰Important

$\square$ If you use toner other than the recommended type, a fault might occur.
OReference
If you want to add toner. $\Rightarrow$ P. 183 " 㐫 Adding Toner"

## Toner Storage

When storing toner, the following precautions should always be followed:

- Store toner containers in a cool, dry place free from direct sunlight.
- Store on a flat surface.

## Used Toner

## Note

ㅁ Used toner cannot be re-used.

Basics

## 2．Copying

## Basic Procedure

1 Make sure that the machine is in Copy mode．
If the machine is not in Copy mode，press the 【Copy】 key．

2
When the machine is set for the user code，enter the user code with the number keys and then press the 【\＃】 key．

## $\delta_{\text {Reference }}$

$\Rightarrow$ P． 68 ＂Other Functions＂．
3 Make sure that there are no previ－ ous settings remaining．

## Note

$\square$ To clear settings，press the〔Clear Modes】 key．
4 Set your originals．

## $\rho_{\text {Reference }}$

$\Rightarrow$ P． 31 ＂Setting Originals＂．

## 5

Set your desired settings．

6 Enter the number of copies re－ quired with the number keys．

## Note

$\square$ The maximum copy quantity can be set between 1 and 999 （default：999）．
$\square$ To change the number entered， press the 【Clear／Stop】 key and enter the new number．
7 Press the［Start】 key．
The machine starts copying．

## Note

$\square$ When you set originals on the exposure glass，press the【\＃】 key after all originals are scanned．
$\square$ Copies are delivered face down．
$\square$ To stop the machine during the multi－copy run，press the 【Clear／ Stop】 key．
$\square$ To return the machine to the ini－ tial condition after copying， press the【Clear Modes】 key．

## : System Reset

The machine returns to its initial condition automatically when your job is finished, after a certain period of time. This function is called "System Reset".

## Note

$\square$ You can change the System Reset time. $\Rightarrow$ "System Reset Timer" in "System Settings manual".

## Auto Off

The machine turns itself off automatically after your job is finished, after a certain period of time. This function is called "Auto Off".

## O Note

$\square$ You can change the Auto Off time. $\Rightarrow$ "Auto Off Timer" in the System Settings manual.

- Auto Off time function will not operate in the following:
- When the warning massage is displayed.
- When the service call massage is displayed.
- When the paper is jammed.
- When the cover is open.
- When "Adding Toner" message is displayed.
- When the toner is being replenished.
- When the User Tools/Counter screen is displayed.
- When fixed warm-up is in progress.
- When the facsimile, printer or other functions are operating.
- When operations have been suspended during printing.
- When the handset is in use.
- When the On-hook dialing function is in use.
- When a recipient is being registered in the address list or group dial list.
- When the Data In indicator goes on or blinking.
- When the sample print/confidential print screens are displayed.

## Setting Originals

## ? Limitation

- Set originals after correction fluid and ink has completely dried. Not taking this precaution could mark the exposure glass and cause marks to be copied.

## 0 Note

$\square$ Basically originals should be aligned to the rear left corner. However, some copy functions may produce different results depending on the direction of the originals. For details, see the explanations of each function.

## $\delta_{\text {Reference }}$

$\Rightarrow$ P. 19 "Originals".

## Setting Originals on the <br> Exposure Glass

1 Lift the platen cover or the document feeder.

## 淮 Important

I Do not open the document feeder with a force. Otherwise, the cover of the document feeder might open or be damaged.

## 0 Note

$\square$ Be sure to open the document feeder by more than $30^{\circ}$. Otherwise the original size might not be detected correctly.
2 Set the original face down on the exposure glass. The original should be aligned to the rear left corner.

1: Reference mark
2: Scale
0 Note
$\square$ Start with the first page to be copied.

3 Lower the platen cover or document feeder.

## Setting Originals in the Document Feeder

## Note

$\square$ The last page should be on the bottom.
$\square$ Do not stack originals beyond the limit mark on the side fence of the document feeder.
$\square$ The original might become dirty if it is written with a pencil or similar tools.

## ${ }^{\circ}$ Reference

Regarding originals that the document feeder can handle. $\Rightarrow$ P. 19 "Originals".
1 Set the aligned originals face up into the document feeder.

1: Limit mark
2: Document guide

## O Note

$\square$ Straighten curls in the originals before setting them in the document feeder.
ㅁ To avoid a multi-sheet feed, shuffle the originals before setting them in the document feeder.

## Original Orientation

You can set the original orientation separately in the following ways.
This function is useful for copying torn originals or large originals.

## - Standard Orientation ${ }^{2}$ ?

Select this function when the original direction is the same as the copy paper direction.

## - $90^{\circ}$ Turn

This function rotates the copy image by $90^{\circ}$.
Use this function when you want to copy onto $\mathrm{A} 3, \mathrm{~B} 4,11^{\prime \prime} \times 17^{\prime \prime}$ paper.

## 1 Press the [Special Original] key.

2 select the original orientation.

## Standard Orientation

 selected.

$90^{\circ}$ Turn
When you want to copy A3 $\square$ ， $\mathrm{B} 4 \mathrm{\square}$ or $11^{\prime \prime} \times 17^{\prime} \square$ size originals， set your original in the landscape orientation and then press the包 key．The machine rotates the original image and you can make copies as you wish．This is useful for copying large originals with the Staple，Punch，Duplex，Com－ bine or Stamp functions．
For example，if you want to copy A3 $\square$ or $11^{\prime \prime} \times 17^{\text {＂}}$ originals with for the Staple function configured as shown below：

## Note

## Basic Functions

The following basic functions are explained in this section.

## * Adjusting Copy Image Density

 Auto and Manual Image Density
## * Selecting Original Type Setting

Text, Text•Photo, Photo, Pale, Generation Copy

## * Selecting Copy Paper

Auto Paper Select and Manual Paper Select

## * Auto Reduce/Enlarge

The machine can choose an appropriate reproduction ratio based on the paper and original sizes you select.

## * Sort

Copies can be assembled as sets in sequential order.

## * Rotate Sort

Every other copy set is rotated by $90^{\circ} \square$ and delivered to the copy tray.

* Stack (The optional Bridge unit and the optional finisher are required for this function)
Copies can be assembled with each page set.
* Staple (The optional Bridge unit and the optional finisher are required for this function)
Each copy set can be stapled together.
* Punch (The optional Bridge unit and the optional 2 Tray finisher are required for this function)
This function is used to make punch holes in copies.

## - Note

I You can select functions to be activated when System Reset is turned on, when Energy Saver is turned off, or after the machine is powered on.
$\square$ You can change default settings for basic functions. $\Rightarrow$ "Settings You Can Change with the User Tools" in System Settings manual.

## Adjusting Copy Image Density

You can adjust the copy image density to match your originals.
There are three types in this function:

## * Auto Image Density

The machine automatically adjusts the image density.

* Manual Image Density

If you require darker or lighter copies, adjust the image density yourself.

## Combined Auto and Manual Image Density

Use when copying originals with a dirty background (such as newspapers). You can adjust the foreground density while leaving the background unchanged.

## Auto Image Density

1 Make sure that the［Auto Image Den－ sity］key is selected．

## Note

$\square$ If the［Auto Image Density］key is not selected，press the［Auto Im－ age Density］key．
$\square$ If you do not wish to set any other functions，press the［Start】 key to start copying．

## Manual Image Density

0
Press the［Auto Image Density］key to cancel it．
2 Press the［Lighter］or［Darker］key to adjust the image density．

## Note

$\square$ If you do not wish to set any other functions，press the 【Start】 key to start copying．

Combined Auto and Manual Image Density

Make sure that the［Auto Image Den－ sity］key is selected．
2 Press the［Lighter］or［Darker］key to adjust the density．

## Note

$\square$ If you do not wish to set any other functions，press the［Start】 key to start copying．

## Selecting Original Type Setting

Select one of the following types to match your originals:

## Text

Select this mode when your originals contain only letters (no pictures).

## * Text.Photo

Select Text-Photo when your originals contain photographs or pictures with letters.

## Photo

Delicate tones of photographs and pictures can be reproduced with this mode.

## * Pale

Select this mode for originals that have lighter lines written in pencil, or for faint copied slips. The faint lines will be clearly copied.

## * Generation Copy

If your originals are copies (generation copies), the copy image can be reproduced sharply and clearly.

## O Note

I You can directly display the [Original Mode] key on the copy original display.

- You can adjust the quality level for each original type.

1 Press the appropriate key to select the original type.

## Note

$\square$ If "Yes" has been selected in "Original Mode Display" of the User Tools, press the [Original Mode] key to select the original type, then press the [OK] key. $\Rightarrow$ "Original Mode Display" in
P. 212 "General Features ${ }^{1} / 4$ ".

If you do not wish to set any other functions, press the [Start】 key to start copying.

## Selecting Copy Paper

There are two ways to select copy paper：

## Auto Paper Select

The machine selects a suitable size of copy paper automatically based on the original size and the reproduction ratio．$\Rightarrow$ P． 42 ＂Rotated copy＂．

## ＊Manual Paper Select

Choose the tray containing the paper you wish to copy onto：Paper Tray，By－ pass Tray or large capacity tray（LCT）．

## $\delta^{\circ}$ Reference

$\Rightarrow$ P． 60 ＂Copying from the Bypass Tray＂．

## －Limitation

$\square$ Auto Paper Select mode is intended for normal and recycled paper．
$\square$ If you set all the paper trays other than＂No Display＂or＂Recycled Paper＂， you cannot use Auto Paper Select．

## Note

$\square$ See the following table for possible copy paper sizes and directions with Auto Paper Select（when copying at a ratio of $100 \%$ ）：

## Manual Paper Select

1 Select the paper tray，bypass tray or large capacity tray（LCT）．

## Note

$\square$ If you do not wish to set any other functions，press the 【Start】 key to start copying．

## Rotated copy

If the direction in which your original is set (landscape or portrait) is different from that of the paper you are copying onto, this function rotates the original image by $90^{\circ}$ and fits it on the copy paper. This function works when Auto Paper Select or Auto Reduce/Enlarge is selected. $\Rightarrow$ "Auto Paper Select" in P. 40 "Selecting Copy Paper" and $\Rightarrow$ P. 43 "Auto Reduce/Enlarge".

## Copying from the Bypass Tray

Use the bypass tray to copy onto OHP transparencies, adhesive labels, translucent paper, postcards, and copy paper that cannot be set in the paper tray.

## O Note

$\square$ The machine can automatically detect the following sizes as standard size copy paper:

| Metric <br> version | $\mathrm{A} 3 \square, \mathrm{~A} 4 \square, \mathrm{~A} \square \square, 8^{1} / 2^{\prime \prime} \times 13^{\prime \prime} \square$ |

$\square$ If you do not use the standard size copy paper, you should input vertical and horizontal dimensions. The sizes that you can input are as follows:

| Metric <br> version | $\bullet$ - Vertical: $100-297 \mathrm{~mm}$ |
| :--- | :--- |
| Inch <br> version | $\bullet$ Vertical: $3.9^{\prime \prime}-11.6^{\prime \prime}$ |
| - Horizontal: $5.8^{\prime \prime}-23.4^{\prime \prime}$ |  |

$\square$ When using paper larger than 433 mm in size, set it so that it is fed straight into the machine.
$\square$ When using paper larger than 433 mm in size, the paper may become wrinkled, and may not be fed into the machine, or may cause paper jams.
$\square$ To make copies onto OHP transparencies or thick paper exceeding $128 \mathrm{~g} / \mathrm{m}^{2}, 35 \mathrm{lb} .$, specify the paper type in $\Rightarrow$ P. 63 "When Copying onto OHP Transparencies or Thick Paper".

Copying will not stop yet．

## 2 Set your original．

## 3 Press the［Start】 key．

The machine stops the original job and starts copying your original．
4 When copying is complete，re－ move your originals and copies．
5 Press the 【Interrupt】 key again．
The Interrupt indicator goes off． The previous copy job settings will be restored and the machine will continue copying from where it left off．

## Original Beeper

The beeper sounds and an error mes－ sage is displayed when you leave your originals on the exposure glass after copying．

## Note

$\square$ To cancel this function，$\Rightarrow$＂Tone： Original remains＂in P． 215 ＂Gener－ al Features $2 / 4$＂．

## Sample Copy

Use this function to check a copy set before making a long copy run．

## Limitation

$\square$ This function can be used only when the Sort function has been turned on．

1 Select Sort and any other func－ tions，then enter the number of copy sets to be made．

## 2 Set the originals．

3 Press the［Sample Copy】 key．
One copy set is delivered for proof copying．
4 After checking the finish，press the［Print］key if the sample is ac－ ceptable．
The number of copies made is the number you specified minus one for the proof copy．

## Note

$\square$ If you press the［Suspend］key after checking the finish，return to step $\mathbf{1}$ to adjust the copy set－ tings as necessary．You can change the settings for Staple， Punch，Duplex，Copy Orienta－ tion，Stamp，Margin Adjust，and Cover／Slip Sheet．However，de－ pending on the combinations of functions，some settings might not be changed．
$\square$ You cannot use the Sample Copy function after changing the settings．

## Changing the Number of Sets

You can change the number of copy sets during copying．

## －Limitation

$\square$ This function can be used only when the Sort function has been turned on．
1 Press the【Clear／Stop】 key when ＂Copying＂is displayed．

2
Press the［Change Quantity］key．

3 Enter the number of copy sets
Enter the number of copy sets
with the number keys，then press the 【\＃】 key．
Stop copying?
Stop copying?
Enter new quantity of sets，then press（\＃）
Change Quartity $10 \rightarrow$＿$<$ 3 $\sim 999>$
$\qquad$

## O Note

$\square$ The number of sets you can en－ ter differs depending on the timing of pressing the［Clear／ Stop】 key．
$\square$ To change the entered number， press the 【Clear／Stop】 key．
4 Press the［Continue］key．

## Preset Reduce/Enlarge

You can select a preset ratio for copying.

## (3) Note

- You can select one of 12 preset ratios (5 enlargement ratios, 7 reduction ratios).
$\square$ Use "Create Margin" to reduce the image to $93 \%$ of its original size with the centre as reference. You can register this function in a shortcut key on the initial display.
$\square$ You can change the preset ratios to other ratios you frequently use. $\Rightarrow$ "Enlarge" in P. 219 "Reproduction Ratio ${ }^{1} / 2$ " and "Reduce" in P. 220 "Reproduction Ratio $2 / 2$ ".
$\square$ You can set and display three kinds of ratio on the initial display. $\Rightarrow$ "Shortcut R/E" in P. 219 "Reproduction Ratio ${ }^{1} / 2^{\prime \prime}$.
$\square$ You can specify which of [Reduce], [Enlarge] or [Mag. Ratio] is to be given priority and displayed when the [Reduce/Enlarge] key is pressed.
$\square$ You can select a ratio regardless of the size of an original or copy paper. With some ratios, parts of the image might not be copied or margins will appear on copies.
$\square$ Copies can be reduced or enlarged as follows:

Metric version

| Ratio (\%) | Original $\rightarrow$ Copy <br> paper size |
| :--- | :--- |
| 400 (enlarge area <br> by 16) | -- |
| 200 (enlarge area <br> by 4) | $\mathrm{A} 5 \rightarrow \mathrm{~A} 3$ |
| 141 (enlarge area <br> by 2 ) | $\mathrm{A} 4 \rightarrow \mathrm{~A} 3, \mathrm{~A} 5 \rightarrow \mathrm{~A} 4$ |
| 122 | $\mathrm{~F} \rightarrow \mathrm{~A} 3, \mathrm{~A} 4 \rightarrow \mathrm{~B} 4$ |
| 115 | $\mathrm{~B} 4 \rightarrow \mathrm{~A} 3$ |
| 93 | -- |
| 82 | $\mathrm{~F} \rightarrow \mathrm{~A} 4, \mathrm{~B} 4 \rightarrow \mathrm{~A} 4$ |
| 75 | $\mathrm{~B} 4 \rightarrow \mathrm{~F} 4, \mathrm{~B} 4 \rightarrow \mathrm{~F}$ |
| 71 (reduce area by <br> $1 / 2)$ | $\mathrm{A} 3 \rightarrow \mathrm{~A} 4, \mathrm{~A} 4 \rightarrow \mathrm{~A} 5$ |
| 65 | $\mathrm{~A} 3 \rightarrow \mathrm{~F}$ |
| 50 <br> $1 / 4)$ | -- |
| 25 | $\mathrm{~A} 3 \rightarrow \mathrm{~A} 5, \mathrm{~F} \rightarrow \mathrm{~A} 5$ |

Inch version

| Ratio (\%) | Original $\rightarrow$ Copy <br> paper size |
| :--- | :--- |
| 400 (enlarge area <br> by 16) | -- |
| $200($ enlarge area <br> by 4) | $5^{1} / 2^{\prime \prime} \times 8^{1} / 2^{\prime \prime} \rightarrow 11^{\prime \prime} \times$ <br> $17^{\prime \prime}$ |
| 155 (enlarge area <br> by 2) | $5^{1} / 2^{\prime \prime} \times 8^{1} / 2^{\prime \prime} \rightarrow 8^{1} / 2^{\prime \prime}$ <br> $\times 14^{\prime \prime}$ |
| 129 | $8^{1} / 2^{\prime \prime} \times 11^{\prime \prime} \rightarrow 11^{\prime \prime} \times$ <br> $17^{\prime \prime}$ |
| 121 | $8^{1} / 2^{\prime \prime} \times 14^{\prime \prime} \rightarrow 11^{\prime \prime} \times$ <br> $17^{\prime \prime}$ |
| 93 | -- |
| 85 | $\mathrm{~F} \rightarrow 8^{1} / 2^{\prime \prime} \times 11^{\prime \prime}$ |
| 78 | $8^{1} / 2^{\prime \prime} \times 14^{\prime \prime} \rightarrow 8^{1} / 2^{\prime \prime} \times$ <br> $11^{\prime \prime}$ |

| Ratio (\%) | Original $\rightarrow$ Copy <br> paper size |
| :--- | :--- |
| 73 | $11^{\prime \prime} \times 15^{\prime \prime} \rightarrow 8^{1} / 2^{\prime \prime} \times$ <br> $11^{\prime \prime}$ |
| 65 | $11^{\prime \prime} \times 17^{\prime \prime} \rightarrow 8^{1} / 2^{\prime \prime} \times$ <br> $11^{\prime \prime}$ |
| 50 (reduce area by <br> $1 / 4)$ | $11^{\prime \prime} \times 17^{\prime \prime} \rightarrow 5^{1} / 2^{\prime \prime} \times$ <br> $8^{1} / 2^{\prime \prime}$ |
| 25 | -- |

1
Press the [Reduce/Enlarge] key.

## Note

$\square$ To select a preset ratio on the initial display, directly press the shortcut reduce/enlarge key and go to step $\mathbf{4}$.
2 Press the [Enlarge] or [Reduce] key.

## 3

Select a ratio.
$\square$
Press the [OK] key.
5 Set your originals, then press the [Start】 key.

## Create Margin mode

Use "Create Margin" to reduce the image by $93 \%$ of its original size with the centre position as reference. You can register this function in a shortcut key on the initial display. By combining it with the Reduce/Enlarge function, you can also provide the Reduce/Enlarge copy with a margin.

## Note

$\square$ You can register "Create Margin" in a shortcut key.
$\square$ You can change the Reduce/Enlarge ratio for "Create Margin".

1 Press the [Create Margin] key displayed on the initial display.

2 If you do not wish to combine it with the Reduce/Enlarge function, set your originals, then press the [Start】 key.

## Zoom

You can change the reproduction ratio in $1 \%$ steps.

## 

## Note

ㅁ The following ratios can be selected:

- Metric version: $25-400 \%$
- Inch version: $25-400 \%$

I You can select a ratio regardless of the size of an original or copy paper. With some ratios, parts of the image might not be copied or margins will appear on copies.
I You can select a preset ratio which is near the desired ratio, then adjust the ratio with the [ + ] or [ - ] key.
1
Press the [Reduce/Enlarge] key.

2 Enter the ratio.
To select the ratio with the [+] and [一] keys
(1) Select a preset ratio which is close to the desired ratio by using [Reduce] or [Enlarge].

(2) Adjust the ratios with the [+] or [一] key.

## Note

$\square$ To change the ratio in $1 \%$ steps, just press the [ + ] or [-] key. To change the ratio in $10 \%$ steps, press and hold down the [ + ] or [ - ] key.

To enter the ratio with the number keys

Press the [Mag. Ratio] key.

2 Enter the desired ratio with the number keys．

## 0 Note

$\square$ To change the ratio entered， press the［Clear］or［Clear／ Stop】 key and enter the new ratio．
（3）Press the［\＃］key．
（4）Press the［OK］key．
3 Set your originals，then press the【Start】 key．

## Size Magnification

This function calculates an enlargement or reduction ratio based upon the lengths of the original and copy.

## Preparation

Measure and specify the lengths of the original and copy by comparing "A" with "a."

## ? Limitation

$\square$ If the calculated ratio is over the maximum or under the minimum ratio, it is corrected within the range of the ratio automatically. However, with some ratios, parts of the image might not be copied or blank margins will appear on copies.

## Note

- A ratio is selected in the range of 25 to $400 \%$.

1 Press the [Reduce/Enlarge] key.

2 Press the [Specifid Ratio] key.

3 Make sure that the [Specifid Ratio] key is highlighted.
4 Enter the length of the original with the number keys and press the [\#] key.

## Note

$\square$ You can enter sizes within the following ranges:

| Metric <br> version | $1-999 \mathrm{~mm}$ (in 1mm steps) |
| :--- | :--- |
| Inch <br> version | $0.1^{\prime \prime}-99.9^{\prime \prime}$ (in $0.1^{\prime \prime}$ steps) |

$\square$ To change the length entered, press the [Clear] or 【Clear/Stop】 key and enter the new length.

6 Enter the length of the copy with the number keys and press the [\#] key.

## Note

$\square$ To change the length entered, press the [Clear] or [Clear/Stop】 key and enter the new length.
$\square$ To change the length after pressing the [\#] key, select [Original] or [Copy] and enter the desired length.
6 Press the [OK] key.
7 Press the [OK] key.
8 Set your original, then press the [Start】 key.
